PRODUCT GUIDE TO KALEA PLATFORM & CABIN LIFTS

Lift solutions for private, public and commercial buildings

KALEA LIFT SOLUTIONS

Kalea Lifts offers you a wide range of elegant lift solutions that will blend in seamlessly with the architecture of any building. Regardless of lift size, model and choice of finish, our lifts are designed to have minimal structural and environmental impact.

THE UNIQUE KALEA QUALITY

Thanks to their smart and space-saving concept, our lifts will add comfort and beauty to any interior, at a fraction of the cost of a conventional lift.

The lift installation only takes a few days and has minimal structural impact on your building. Our screw-driven lift technology is reliable, robust and environmentally friendly, making a lift a by Kalea a very good choice.

STANDARDS AND CERTIFICATES

Type Certificate. Green Label/Energy Certificate:
A with EcoSilent
B with our standard drive

KALEA ECOSILENT – A QUIET REVOLUTION FOR SCREW-DRIVEN LIFTS

For many years now, the demand for lifts has been growing at the same pace as the ageing population and the number of floors in our buildings. However, lifts consume an estimated 4% of the energy produced globally and generate a lot of noise pollution in our homes and cities.

This inspired our engineers to create the EcoSilent drive system, which is a quiet revolution for screw-driven lifts.

A lift equipped with EcoSilent carries Energy Label A and only uses an estimated 215 kWh per year, which is less than a modern washing machine.*

In addition, the EcoSilent system brings the sound level down to as little as 40 dB, which equates to the sound level inside a quiet library.**

* Estimated energy consumption based on a 2 stop lift with 3.6 m travel, equipped with EcoSilent and a frequency of use of 20 travels/day.

** Sound measurement performed 2 m from a lift, with a 150 kg load, travelling at constant speed.

SILENT OPERATION

Lifts equipped with the EcoSilent system are extremely quiet. Inside the lift, the sound level is 55 dB equivalent to the sound of a dish washer. Outside the lift, the sound level is 40 dB.

KALEA CABIN LIFT

THE SMART CHOICE

The modular construction of Kalea C1 Futura enables us to streamline our lift production, but also offers you several advantages: Your lift can be delivered and installed a lot faster than other lifts, while our ready-made lift concept minimises the need for refurbishment and reduces your building costs. In addition, our screw-driven system is very reliable and low-maintenance, compared to other drive systems.

SPACE-SAVING DESIGN

Operated with one-touch automatic controls and equipped with sliding doors, the Kalea C1 Futura gives you all the comfort of a cabin lift with the major advantages of a platform lift.

- Low lift pit of 100 mm
- 2500 mm top height
- Ready-made shaft as an option
- Lift capacity of 525/630 kg

LIFT DESIGN TRUE TO YOUR STYLE

Kalea C1 Futura offers you an elegant, efficient and adaptable lift solution. Our great choice of colours and materials makes it easy for you to create a lift design, perfectly in tune with your own sense of style.

BUILT-IN TO BLEND IN Kalea C1 Futura is available with or without a shaft for easy installation inside a site-built or existing lift shaft.

FLOOR

Standard floor - Altro Walkway - Classified A+ in the Green Guide with slip resistance R10. Black 100% phthalate free vinyl.

FLOOR

Kalea offers a variation of floor options with selected patterns like Forbo Surestep Material Black Seagrass 18572.

FLOOR

All floors contain recycled material. The durable and anti-slip treated surface is suitable for public environments.

CABIN WALLS

Rustic oak continues to be a strong trend and looks just as great in a country home as in an industrial style flat.

CABIN WALLS

Blonde wood makes your room look light, airy and sophisticated in a very Scandinavian fashion.

CALL BUTTON

C1 Futura is available with elegant and user-friendly touchscreen controls inside the cabin and on the landings.

LIFT DESIGN IN TUNE WITH YOUR BRAND

Kalea offers you a great choice of colours and materials to make it easy for you to create a lift design, perfectly in tune with your brand and sense of style.

KALEA COMMERCIAL LIFTS

Platform lift Kalea A4 Primo is a space-saving and elegant lift solution which is great choice for your business. The ready-made lift shaft, minimal pit and low top height make lift installation incredibly fast and easy in both new and existing buildings.

BESPOKE FEATURES

To keep the space open and airy, the Kalea A4 Primo can be equipped with a gate on the top floor.

For this particular project, customised wooden door handles were created to make the lift design tie in with the beautiful hardwood floor.

CREATIVE LIFT DESIGN FOR YOUR HOME

The compact design and great choice of colours, materials and accessories, enable home lift Kalea A4 Mini to blend in seamlessly with any interior style.

KALEA HOME LIFTS

Imagine your home without stairs, a home where all floors are accessible at the push of a button. The A4 Mini can make this happen. Contact Kalea for advice and we will help you design the home lift of your dreams.

The A4 Mini is small enough to fit inside the tiniest of spaces, yet big enough to make a world of difference.

KALEA PUBLIC LIFTS

The low pit, small footprint and ready-made lift shaft make the Kalea A4 Primo an ideal lift solution for existing buildings.

Kalea offers you a great choice of different shaft materials, colours and door models to create the perfect lift design for your project.

The elegant steel doors with panoramic glazing is our standard door model, but we also offer gates, aluminium doors and fire rated doors.

KALEA CARGO & STRETCHER LIFTS

The Kalea A4 Mille is a large, powerful and versatile lift. The lift is certified for transportation of both passengers and goods and has a capacity of 1000 kg.

The low lift pit, reduced top height and ready-made shaft, make the A4 Mille a very cost-efficient lift solution for a wide range of public and commercial applications.

VERSATILE & POWERFUL LIFTS

Thanks to the generous platform dimensions and extra wide doors, the Kalea A4 Mille has the capacity to handle goods pallets and pallet trucks, just as well as stretchers, hospital beds and groups of up to 10 people.

OPTIONS FOR YOUR COMFORT

Because your comfort is important to us, we offer a wide range of accessories and options to make our lifts even more convenient and easy to use.

SHAFT OPTIONS - The ready-made shaft is available in steel or in clear or tinted safety glass. All four sides of the lift shaft can be glazed for an open and airy look.

DOOR MODELS - Choose between steel doors, aluminium doors or EI60 fire rated doors. The steel and aluminium doors are available with concealed automatic door openers to provide access in full comfort.

TOUCHSCREEN CALL BUTTON - The call button with touchscreen panel includes a level indicator. A tag reader for auto lock is available as an option.

CLASSIC CALL BUTTON - The classic call button is available with a white, grey, brown or black face plate and can be fitted with various locking systems. The call buttons can also be wall-mounted as an option (box provided).

WE ARE HERE FOR YOU - When you buy a lift from Kalea you may need to spend a bit more on our high-quality equipment, but a lot less on labour and refurbishment. We will follow you every step of the way from order to installation.

THIS IS OUR 1-2-3 SYSTEM:

Step 1: Personal advice for your specific project and needs.

Step 2: Fast delivery and installation by your Kalea dealer.

Step 3: Service provided by your certified Kalea dealer.

PERSONAL SUPPORT

Your Kalea dealer can visit the installation site to find the best lift solution for you. The lift is custom-made, so you can rest assured that it will fit. Thanks to its space-saving, modular construction, the lift can be installed, without extensive building adaptation, in as little as 2-3 days.

Day 1 - Installation

First day - The bottom frame, guides and platform are installed. Your platform lift can be installed with or without a lift pit.

Day 2 - Installation

Second day - The doors, shaft and platform cladding are mounted, all electrics are plug & play and easy to connect.

Day 3 - Installation

Third day - The finishing touches are applied and all functions of the lift are tested. Your lift is now ready to use.

SERVICE IN SAFE HANDS

Our screw-driven technology is simple and robust and our lifts are low-maintenance. Nevertheless, it is important to keep your lift in good working order, and the best way to do that is to sign a service contract with a trained and certified Kalea dealer.

All Kalea lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European quality standards, Machinery Directive 2006/42/EC and EN 81-41. This product information is general and we reserve the right to modify product design and specifications. Minor deviations in colour reproduction can occur.
